## SUMMARY

Full-Stack Developer currently contributing to the Tarkett project, focused on enhancing access to flooring tools and digital resources. Experienced in automated testing (Cypress, PHPUnit, Jest) to ensure code reliability and maintainability. Strong background in Agile methodologies (code reviews, sprint demos) and DevOps practices (Docker, CI/CD, Git) to streamline development and deployment processes. Seeking a Full-Stack role where I can contribute to innovative, high-impact projects.

---

## EXPERIENCE

### Full-Stack Engineer (Symfony & Vue.js) | SQLI | Oujda, Morocco | March 2023 – Present

- Development and maintenance of the platforms **portal.tarkett.com** (North America & Canada) and **professionals.tarkett.com** (Europe) using Symfony 5 and Vue.js, improving regional access to flooring tools and digital resources.
- Implementation of automated testing with Cypress, PHPUnit, and Jest to ensure functional reliability and high code quality.
- Led weekly sprint demos, participated in estimation sessions, conducted code reviews for a team of 3+ developers, and occasionally facilitated daily stand-up meetings to strengthen team collaboration.
- **Technologies & Tools:** PHP 8, Symfony 5, Twig, Vue.js 3, Nuxt.js, JavaScript, jQuery, CSS, Webpack, Doctrine, SQL, MySQL, Elasticsearch, DynamoDB, Composer, npm, REST/SOAP APIs, Postman, SoapUI, PHPStan, PHPUnit, Jest, Cypress, Git, GitHub, Docker, Blackfire, Sentry, Varnish, Linux, Domain-Driven Design (DDD), Trello, Azure DevOps, Scrum.

### PHP Software Engineer | ALTEN | Fez, Morocco | September 2021 – March 2023

- Maintained and enhanced the customer portal for **Bouygues Telecom** (France), ensuring stability and continuous improvement of the platform.
- Participated in sprint planning and conducted effort estimations every four weeks to support task prioritization and delivery planning.
- Performed code reviews to ensure adherence to quality standards and best development practices.
- Designed and executed PHPUnit tests, using mocks for local testing to optimize development efficiency and test reliability.
- **Technologies & Tools:** PHP 7, Zend Framework 1.12, jQuery, AJAX, CSS, MVC, Singleton pattern, Composer, PHPUnit, REST/SOAP APIs, Postman, SoapUI, WampServer, Git, GitLab, SVN, OpenShift, Jenkins, Jira, Confluence, Scrum.

### Final Year Internship – Symfony Development | ALTEN | Fez, Morocco | March 2021 – August 2021

- Contributed to the migration of a maintenance (TMA) project from Zend Framework 1.12 to Symfony 5.
- Gained hands-on experience with SOAP web services, including mock creation for testing purposes.
- Analyzed and explored the Zend Framework architecture to understand its structure, components, and legacy implementation.
- **Technologies & Tools:** PHP 7, Zend Framework 1.12, Symfony 5, MVC, jQuery, MySQL, GitLab, Postman, SoapUI.

## PROJECT

### Volubilis Car – Car Rental Application | 3ABC | volubiliscar.com | November 2025 – December 2025

- Migrated a static website to a dynamic car rental management application using Symfony 5.4.
- Designed and implemented the backend, including MySQL database modeling for vehicles, users, and seasonal pricing.
- Developed the user authentication system and managed user roles.
- Integrated frontend (HTML, CSS, JavaScript) with the Symfony backend to ensure seamless functionality.
- Deployed the application on a shared hosting environment via cPanel, including server and database configuration.
- **Technologies & Tools:** Symfony 5.4, PHP 7.2, MySQL, Doctrine, HTML5, CSS3, JavaScript, Git, cPanel.

### **Leave Tracking Application (Front End) | Upwork | [ejaza.app](#) | November 2022 – March 2023**

- Enhanced features of an existing React dashboard and website, integrating them with backend services.
- Fixed bugs and improved overall functionality to ensure a smooth user experience.
- Conducted thorough testing, identifying and resolving 95% of reported issues prior to deployment, ensuring a reliable and seamless application.
- Technologies & Tools:** Next.js, React.js, Redux, CSS 3, Material UI, Postman, Docker, Git & Github, Slack, Miro.

### **XO Game (Front-End) | [adnaneyoussefi.gitlab.io/xogame/](#) | February 2021 – February 2021**

- Developed a Tic-Tac-Toe game using React.js, applying newly acquired skills over a 20-day period.
- Designed the game logic, including win conditions and interactive UI updates.
- Deployed the application on a personal portfolio website using GitLab CI/CD pipelines, showcasing React proficiency.
- Technologies & Tools:** React.js, JavaScript, HTML5, CSS3, GitLab CI/CD.

### **Parapharmacy Web Application (Full-Stack) | April 2020 – June 2020**

- Developed a modular web application using Symfony 4 for parapharmacies in Morocco.
- Enhanced knowledge of Symfony with a focus on best practices, modular architecture, and performance optimization.
- Technologies & Tools:** Symfony 4, Doctrine, Bootstrap 4, MySQL, Git & GitLab.

---

## **EDUCATION**

**Master's Degree in Information Systems Engineering | SupMTI | Oujda, Morocco | 2021**

**Professional Bachelor's Degree in Business Intelligence | École Supérieure de Technologie | Oujda, Morocco | 2019**

**DUT - Computer Applications Development | École Supérieure de Technologie | Oujda, Morocco | 2018**

---

## **SKILLS**

**Langages:** HTML, CSS, JavaScript, Typescript, PHP, SQL

**Frameworks/Librairies:** Symfony, Zend, Laravel, React.js, Vue.js, Next.js, Nuxt.js, jQuery, Node.js, Express.js, Bootstrap, Tailwind CSS, , Material UI, reactstrap

**Databases:** MySQL, MariaDB, PostgreSQL, MongoDB, Firebase, SQL Server, DynamoDB

**Tools & DevOps:** Git, SVN, Docker, Jenkins, RabbitMQ, Sentry, AWS, OpenShift, Varnish, Redis, Linux, cPanel, SSH, Webpack, Twig, Doctrine, Composer, npm, Elasticsearch, Wampserver, XAMPP

**Testing & Methodologies:** PHPUnit, Jest, Cypress, Test Driven Development (TDD), PHPStan, Blackfire, Postman, SoapUI, REST/SOAP

**Project Management & Collaboration:** Jira, Trello, Confluence, Azure DevOps, Slack, Miro, Kanban, Scrum

**Languages:** Français avancé, Anglais avancé, Arabe natif
